## The writing is on the wall: Soda blasting is the best solution!

Graffiti accounts for nearly 35 percent of all property vandalism in the U.S., according to the Bureau of Justice Statistics.

Graffiti has a significant impact on local communities: it drives down business revenue, damages citizen morale and lowers property values.

Many solutions promise to eliminate graffiti altogether but just end up leaving the surface looking as unsightly—or worse—than it did before it was tagged.

Typically when you remove graffiti, you can tell where it was even after the job is finished. With soda blasting, we can eliminate all signs of tagging without harming the original paint by simply adjusting the amount of pressure we apply to the surface.

## ECO-FRIENDLY

We use FDA-approved, water-soluble, non-destructive sodium bicarbonate to eliminate paint from a variety of surfaces. Our gentle process restores most surfaces back to its original condition.

## MOBILE

We can complete most jobs in under a day. Because we're mobile, we serve the entire region.

Immediate removal within 24-48 hours is critical to successful graffiti prevention, so that's why we respond to your calls instantly.

## EXPERIENCED

Delaton Service Corporation delivers superior service on-time and within budget. Our contractors are experienced and certified, so you can trust your next project with us.

## IT'S A FACT

Graffiti clean-up is costly: San Jose, Calif. spends \$3 million a year fighting it; city officials in Minneapolis, Minn., fork over about \$4 million while Portland, Ore. Shells out about \$2 million annually.

Studies are being done on a deterrent for "tagging." Most experts agree that fast removal is the best method. That is where we can help you. 1 SodaBlaster can do in 3-4 hours what used to take 3-4 men 3-4 days to do. That is fast removal!
